

This project is intended to act as a living incarnation of the teachings of Dr. Ron Paul. By using a sound money with his likeness on it, the full scope of his philosophy is preserved, and cannot be bent to the will of others. we have seen Bitcoin

became less a p2p electronic cash system to more of a digital gold.

Money has long been adorned with the faces of influential persons and leaders. Ron Paul Coin was the first cryptocurrency to do so, and for good measure, as cryptocurrency is a modern method

for achieving that which he worked towards. Because

of cryptocurrency, we move one step closer to the vision of liberty, ~~peace~~, government transparency, and the end of the federal reserve.

As many are aware, Bitcoin serves to create sound money through a fair distribution, limited supply, and permissionless use. In addition to this,

The following are ways in which Ron Paul Coin seeks to achieve his vision:

Charity: Ron Paul Coin seeks to provide funding for the existing

programs in Ron Paul's name. An increase in funding for the Ron Paul Institute would expand the educational outreach and provide more people with the tools they need to achieve liberty. As more achieve liberty through peaceful means, they in turn inspire others to follow suit, as they have not stepped on those around them with these methods.

Marketing efforts: marketing is intended to expand the awareness of Ron Paul and his philosophy, and to bring enjoyment of an exciting/fun and wholesome face to ^{the work of} cryptocurrency, whose philosophy and mission also happens to be extremely based.

Monetary transparency: all accounting of the development, marketing, and charity funds will be publicly available on ronpaulcoin.org, as to act with the transparency that Ron Paul would have intended.
